Sixth graders value their lockers for school work and fun

With new technology — Kindles, iPads and Google Drive — the question for many schools was are lockers becoming a thing of the past? Some schools don't allow students to use them or are removing them. Some districts are building schools without lockers. For us, they were still an important part of our daily lives.

Even with the introduction of BYOD this year, lockers here are still essential for our students to keep their electronic devices and other items safe. If the sign in a classroom didn't say BYOD, a student's device had to be powered off and in their locker.

"You have an electronic

device for school or it's the best way to contact your parents," Mattie Meyer (6) said. "But it's important to keep it hidden in your locker and safe so no one takes it."

It was also important to 6th graders to have a locker decorated for fun and neat to be find your homework.

"It is good to keep your locker clean and organized so you can find things for each class and not be late to your classes," Dana Mewhinney (6) said.
