# An Egg-cellent Find

## EUREKA!

### ALL STRUNG OUT

While learning about vectors, Kaci Builta, Candace Gautreaux, and Morgan Grisham perfect their line to accurately create a shape on the ground. "We were racing Chelsea's group to finish first, but it ended up being a tie," Kaci said. By following directions previously given to them, Mr. Ryan Burgard's 7th period Pre-AP Physics class made the shape by wrapping strings around rods the groups placed, which spelled out THS 16. *Photo by Megan Byrd*

DRESS  
YOURSELF

"Playing guitar helps me get my mind off things. I got into guitar through Blink-182 and punk-rock in general. I started listening to them a bit. They're a youthful band I could relate to some of their songs. Playing with Jacob is something that brought our friendship, along with Blink-182 and punk-rock." Cash Timmerman, 11th
