STUDENTS EXPLORE SCIENCE

## Q&A

### WHAT WAS YOUR FAVORITE LAB?

"My favorite lab in high school, so far, was dissecting the pigs in Biology because I want to go into the medical field," sophomore [Kayla Rieger](#) said.

### WHAT CLASS WILL YOU USE LATER IN LIFE?

"Biology goes with living things and I am a living thing so I will use biology most," sophomore [Travis Cook](#) said.

### WHAT WAS YOUR FAVORITE SCIENCE CLASS?

"My favorite class would be Anatomy. I have learned about the body and I liked doing dissections," senior [Katelynn Leonards](#) said.

**CAT OUT OF THE BAG** With a disgusted look on her face, senior [Faith Jenkins](#) puts a cat back in the bag. Jenkins' favorite class in high school was anatomy. "I like anatomy because it really challenged me on a day to day basis and I felt more involved," Jenkins said. (Photo by Rebecca Rabius)

**SILLY SCIENCE** Laughing, juniors [Adrianna Navarro](#), [Hannah Gajewsky](#), and [Savannah Cessa](#) try to find the velocity in the experiment. While doing the experiment, the girls dropped the whole ring clamp. "I like doing experiments because we get a break from all the class work," Navarro said. (Photo by Evan Delgado)

**DOES YOUR POWER WORK?** Focused, juniors [Brandi Rosales](#), [Kenzie Floyd](#), and [Faith Vincek](#) assemble an experiment for Physics. Students like hands on experiments better than normal class work. "I like doing experiments because we actually get to learn and understand what's going on," Floyd said. (Photo by Evan Delgado)

**MODEL STATUS** Making a silly face, senior [Lilly Thurman](#) poses with a cat. Anatomy has been dissecting cats for three years. "I thought dissecting the cat was cool because we got to see the different muscles," Thurman said. (Photo by Rebecca Rabius)

1. seniors Amber Adamcik and Allen Anderson. 2. seniors Brooke Polak and Miya Kubena. 3. seniors Caleb Moseley and Maren Ellis. 4. seniors Lilly Thurman and Lourdes Rodriguez. 5. seniors Brooke Boettcher and Haley Clark.

**BLAST OFF** Ducking out of the way, junior Christian Otto launches his bottle rocket for Physics. Otto's favorite thing they did in Physics was the bottle rockets. "I liked doing the rockets because it was the first fun thing we did in Physics all year," Otto said. "I was surprised it wasn't a lot of work."

**TO THE FUTURE** With a smile on her face, junior Sarah Fajkus rides the hoverboard. Fajkus is in Advanced Physics and this is their fun end of the lab. "The hoverboards were a lot of fun," Fajkus said. "Because Physics is hard, it was nice just to have fun in there."
